

A STORY OF OCEAN PLASTICS

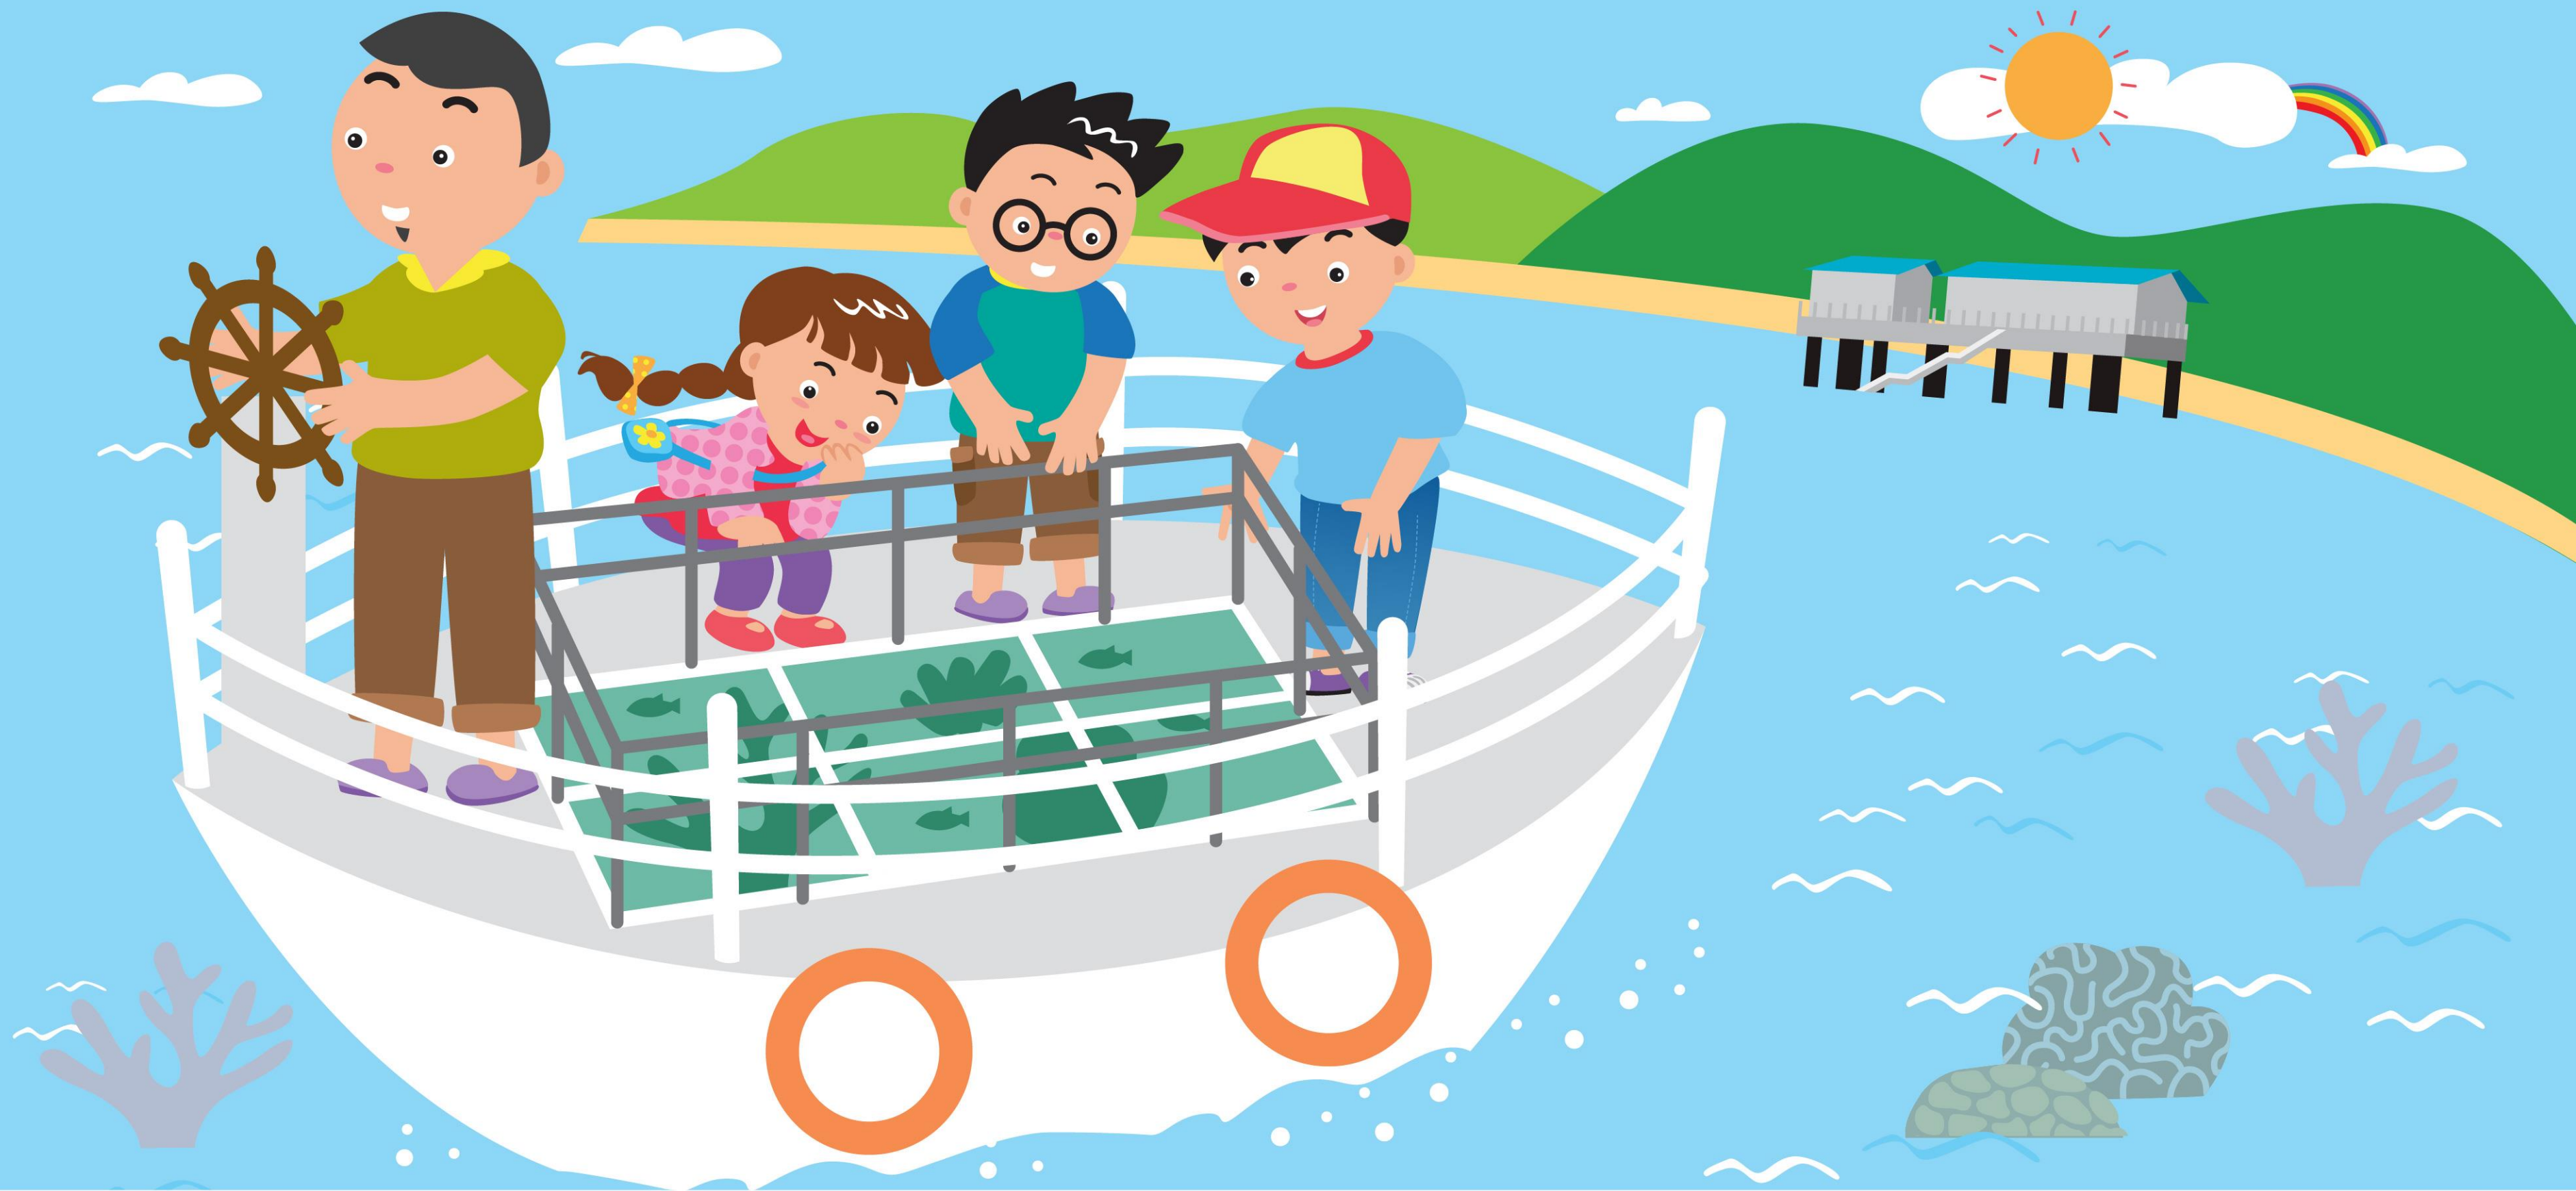

計劃贊助：
Project Sponsored by:

Let's get
some snacks and drinks
for tomorrow's lunch!

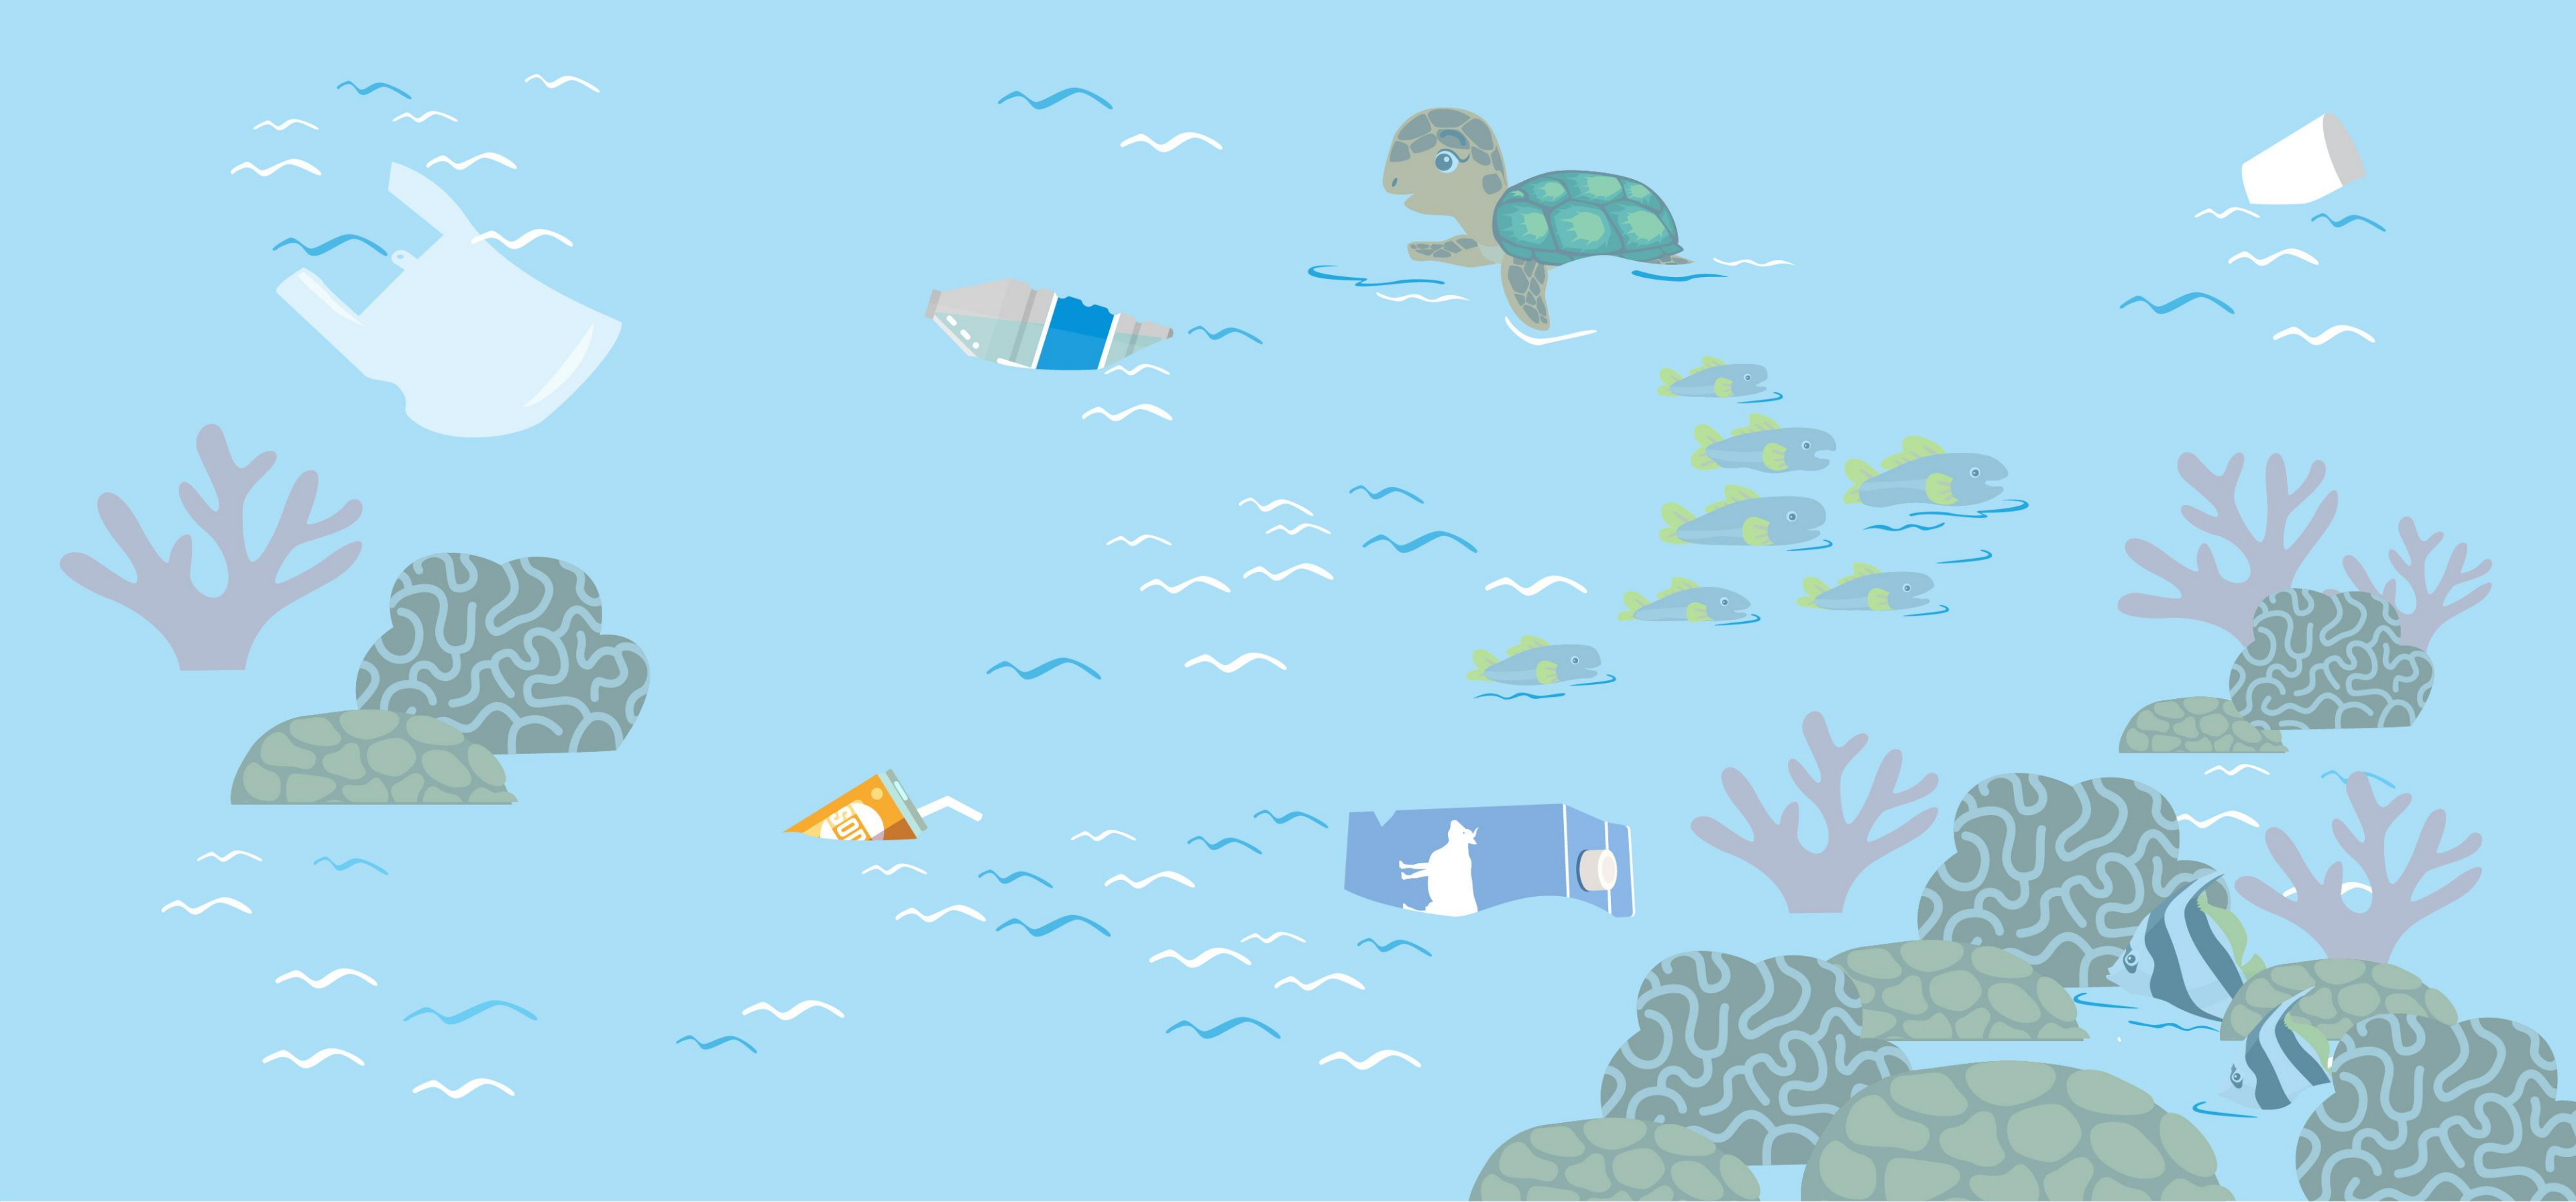

**Charlie, Victor and Kathy visit Hoi Ha Wan Marine Park
to observe its coral communities.**

After the visit, they have a picnic on the beach.

However, they leave the beach without tidying up their litter.

**The plastic waste is soon blown into the ocean,
where it starts to affect marine animals.**

**A sea turtle gets a straw stuck in up its nose.
A plastic bag blocks sunlight from reaching the coral.**

2 months later...

**Charlie, Victor and Kathy join an outdoor coastal clean-up.
They are shocked to see so much marine litter on the shore.**

**Do you
remember our
beach picnic?**

**Oh! We used a lot of
single-use plastic items,
and even left them
on the beach.**

CHARLIE、VICTOR和KATHY可以透過甚麼 方法和行動來減少海洋垃圾？

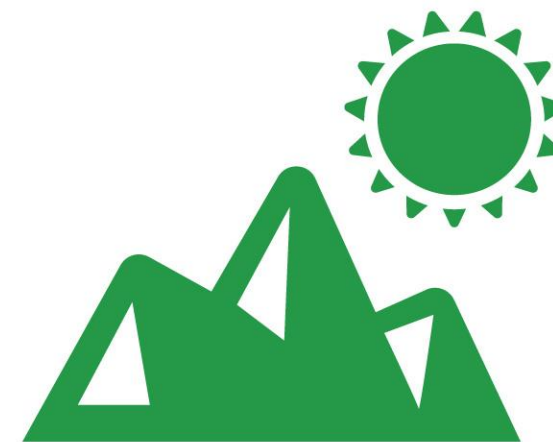

What can Charlie, Victor and Kathy do to reduce the amount of
single-use plastics in their daily lives?
