

**REDUCE,
REUSE,
RECYCLE**

LIVING

Landfills release large amounts of methane which contributes to climate change.

methane
 CH_4

**NO
PLASTIC
BAGS**

Hong Kong people disposed a daily average of 11,723,844 plastic bags in 2019. Plastic is indestructible. It does not break down, instead, it breaks up into smaller fragments posing major threat to wildlife.

**REUSE
FIRST, THEN
RECYCLE**

Recycle plastic, styrofoam, paper and cardboard containers and metal. Avoid packaging that won't go in your recycling bin to cut landfill waste.

Check out the locations of EPD's nine recycling stations and 22 recycling stores. There are also over 100 recycling spots at other locations!

**REDUCE
ENERGY
USAGE**

Cut your household emissions by using energy saving lightbulbs and electrical appliances with an "Energy Efficiency Grade 1" label.

**UPCYCLE
IT!**

Don't throw away unwanted clothes. Donate them or show your creativity by "mix-and-matching" to create new styles.

**4,840,000
PLASTIC BOTTLES
per day**

**REFILL
YOUR OWN
BOTTLE**

Hong Kong people disposed nearly 5 million plastic bottles daily in 2019. Say no to single-use plastic bottles and bring your own water bottle!
